TMF - 2014
Disinfecting schools that were hit by big floods in 2014.

Recent Projects

******* (NDA protected)/part-time
03/2019 – currently
Bet Arif - Israel

Regular uploads and moderation for WordPress website. Monitoring code and making changes on the same, getting on board and managing new team members, uploading content and quality assurance.

tech stack: WordPress, CSS, HTML and JS

Petar Đurković
09/2019 – currently
Belgrade - Serbia

Creating a Web App for tracking project structure. In this project, I'm working on a team of three for creating a project's source code monitoring app, which had features like displaying class' properties and relations between classes.

tech stack: React.js, Redux, TypeScript, git

Forandor
02/2019 – 09/2019.
Belgrade - Serbia

Rent-a-car Web App for the startup company based in California, US. The App is used to help users rent vans, customized for different purposes like party, safari, team-building, family travel, etc. Some of my tasks were fixing react-router, implementing search filters, UI bug fix-ups, etc.

tech stack: React.js, Redux, React-router, git

Forandor
03/2019 – 06/2019.
Belgrade - Serbia

Creating science Web App for lab technicians for the company based in Potsdam, Germany. The app is used to track the process of protein development and show graphs generated from input data.

tech stack: React.js, Redux, Sass, Material-UI, ESLint, git

Forandor
11/2018 – 05/2019.
Belgrade - Serbia

Creating a Web App for a startup based in Munich, Germany. The purpose of this App was to help doctors track a patient's pregnancy progress, activities, weight, and mood. Doctors were able to write articles, check-ups, to-dos, and recommendations using App and track patient progress on those as well.

tech stack: React.js, Redux, Sass, Reactstrap, git

KiveliTranslations
02/2018 – 09/2018.
Belgrade - Serbia

Creating and maintaining the website for a translation agency.

tech stack: WordPress, MySQL, HTML, CSS

BTravel
10/2017 – 04/2018.
Belgrade - Serbia

Creating and maintaining a website for travel agency, configuring hosting services.

tech stack: WordPress, MySQL, PHP, jQuery, HTML, CSS, Bootstrap
